Area Inundated:	94311.00	NW NE SW SE	NW NE SW SE	NW NE SW SE	NW NE SW SE

Small Dam Required?: No

OTHER COMMENTS*****

This right is based on shares of stock in the South Jordan Canal Company. This right will be maintained so long as the shares are valid. Water from the well is conveyed by pipeline and discharged into the Strawberry Canal. From there, the water flows down the canal along the east side of West Mountain. At the end of the canal (Section 23, T8S, R1E, SLBM), the water is piped to three equalizing reservoirs, where the water is pumped to the irrigated acreage as listed in paragraph 4. The pumps on Utah Lake are seasonal. They are placed on line as needed and removed when not in use. Due to the high salt content of Utah Lake the pumps are used as a back-up to the well on an as needed basis.
